

Interferon-gamma releasing assay

Institution	Seoul-Bae Internal Medicine	Patient ID	154408	Collected	/ /
Patient Name	Sungjoon Park	Ordering Physician		Received	2021/04/09
Date of Birth	1987/03/11	Specimen Type	Whole Blood	Tested	2021/04/09
Age / Sex	34 / M	Accession No.	20210409-122-3858	Reported	2021/04/12
Clinical Info./Remark	Quantitation Gold Test				

Test Result

RESULT		Reference Range	Interpretation
Negative		Negative	Positive: (TB Ag*-Nil: ≥ 0.35 & $\geq 25\%$ of Nil) & (Nil: ≤ 8.0) Negative: (TB Ag*-Nil: < 0.35 or ≥ 0.35 but $< 25\%$ of Nil) & (Nil: ≤ 8.0) & (Mitogen-Nil: ≥ 0.5) *Either TB1 or TB2 Ag
TB1 Ag-Nil	-0.01	Unit : IU/mL	
TB2 Ag-Nil	0.00		
Mitogen-Nil	9.70		
Nil	0.05		

Interpretation and Comments

Negative

No interferon-gamma response to TB antigens was detected.

Infection with Mycobacterium tuberculosis is NOT likely.

A negative result alone does not excluded infection with M. tuberculosis
